

Our forklift hitch enhances conventional forklift capabilities, allowing for effortless moving of objects like trailers with precision.

With safety being top priority, our forklift hitch features a secure heel retention system for stability and peace of mind when maneuvering heavy loads.

Fitted with a 3000kg capacity ball hitch as standard, our hitch is ready for a variety of tasks, from moving trailers to containers.

Upgrade your forklift with our reliable and durable hitch to increase efficiency in warehouses, construction sites, and other industries requiring efficient material handling.

Model Ref	Capacity (kg)	Length (mm)	Max Fork Size (mm)	Max Fork Spread (mm)	C of G (mm)
FM-THBP	3000	1200	130 x 55	360	620

Features & Benefits

- Supplied with 50mm diameter ball hitch and pin for maximum usage flexibility
- Standard length of 1200mm making it compatible with most standard forklift forks
- Heel pin retention to ensure the hitch is secured safely to forklift forks
- Generous 'drive in' fork pockets making the hitch one person fitment, thus helping to reduce standing time and downtime
