

Designed to allow simple lift and empty operation of a large wheelie bin, this wheelie bin handler is the perfect forklift attachment when bins of this size need to be emptied.

With adjustable catch sections to allow for small variance on bin widths, the wheelie bin can be safely picked up via the side trunnions and transported to the waste receptacle from where it needs to be emptied

With no moving parts, wires or pulleys, the wheelie bin is simply positioned against the side of the waste receptacle, and with forward motion applied, the bin rotates to the required angle suitable for tipping.

Model Ref	Wheelie Bin Type	To Suit Lid Type
<b>WBH-1100L</b>	660 - 1100 Litre	Flat Lid
<b>WBH-100SL</b>	660	Sprung Lid

N.B. Only suitable for use with wheelie bins that have side trunnions

Model Ref	Capacity (kg)	Max Fork Size (mm)	Fork Spread (mm)	C of G (mm)	Load Centre (mm)	Weight (kg)
<b>WBH-1100L</b>	500	140 x 60	750	849	1190	135
<b>WBH-100SL</b>	500	140 x 60	750	849	1190	145

## Features & Benefits

- Suitable for use with 660 - 1100 litre wheelie bins, offering flexibility of use over the most popular size of large wheelie bins
- Adjustable catch sections to allow small variances of bin widths to be handled
- Simple operation allows wheelie bins to be tipped and emptied without manual handling, thus reducing risk of injury
- Designed with no moving parts allows for low service and maintenance costs
- Heel pin retention to forklift forks ensure the wheelie bin handler is safely secured to the forklift truck during operation
